

BUSINESS MOBILE MANAGEMENT

Business mobiles. Under your control.

See usage. Manage spend.
Keep your team connected.

For businesses with more than 10 phones.

VISIBILITY

Know what is happening

CONTROL

Set rules for your team

SUPPORT

Move forward with CTN

More phones should not mean more chasing.

When the team grows, small mobile questions can become a daily job.

01

What is driving the extra spend?

See usage and charges by connection, then decide where to act.

02

Who needs different settings?

Give office staff, field teams and frequent travellers the right controls.

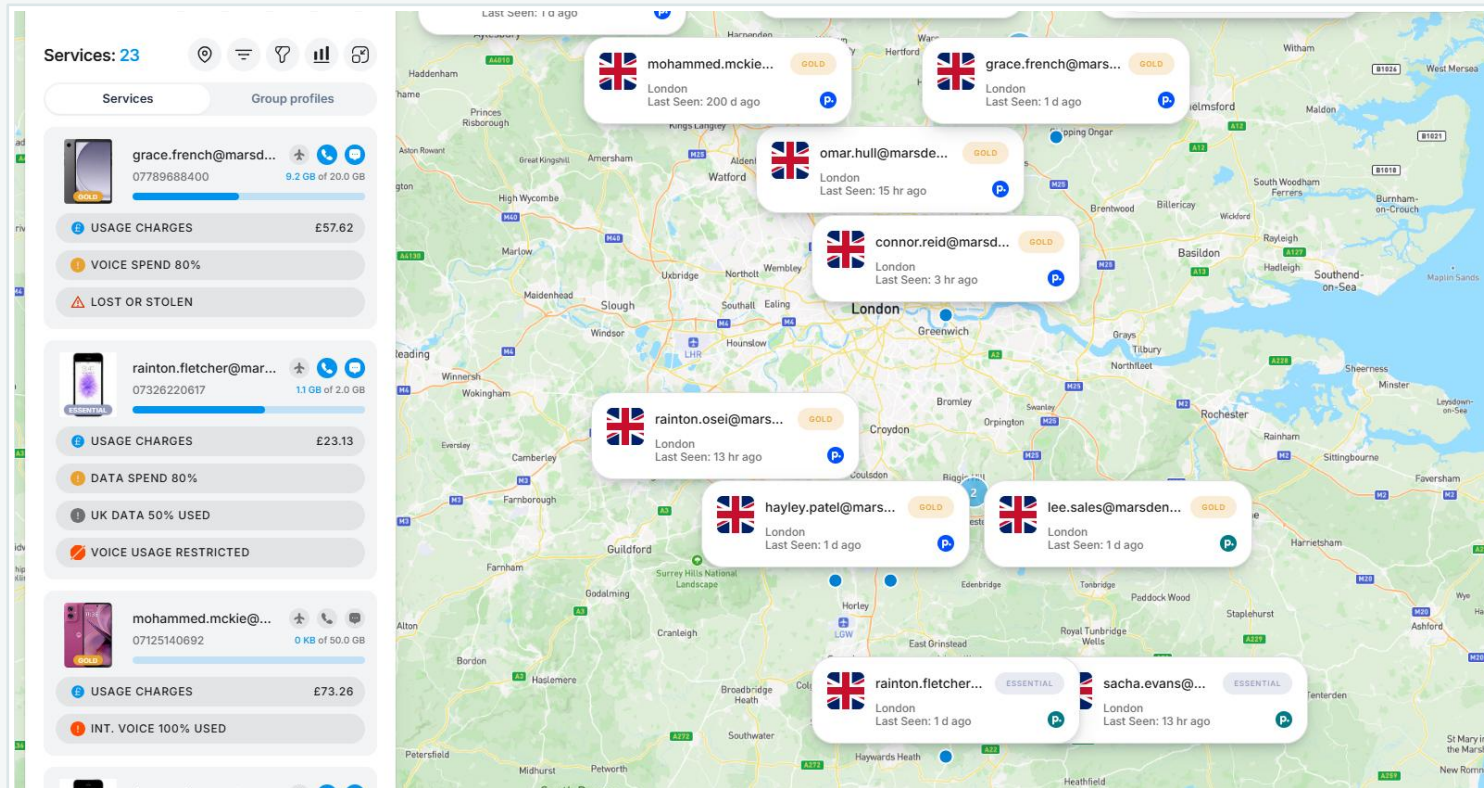

03

Where do we start when a phone fails?

Bring the service information together so CTN can investigate.

One clear view of your business mobiles.

Find a connection. Check its usage. See its reported location.

Demo screen. Example data. Features depend on package and permissions.

1

Your whole team

A searchable list of business connections.

2

Useful detail

Usage, alerts and status for each line.

Turn usage into better decisions.

1 Check the allowance

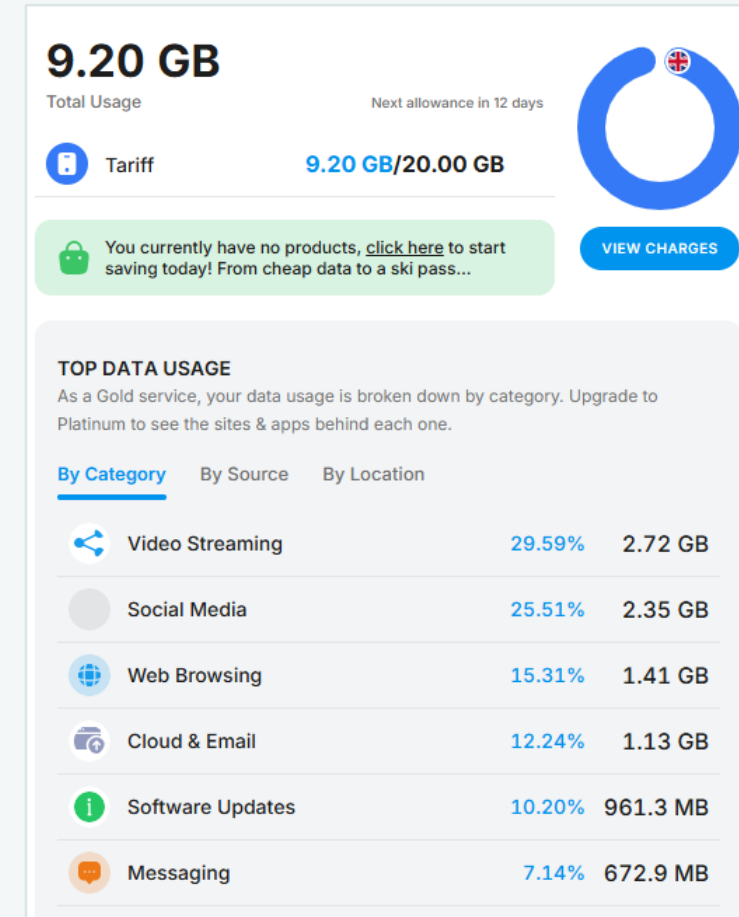

See how much data a connection has used and what remains.

2 Understand the pattern

Use the available usage breakdown to spot the activities behind consumption.

3 Choose the next step

Review the tariff, add an appropriate allowance or adjust the controls.

Demo screen. Example data. Features depend on package and permissions.

Put a plan around extra spend.

Choose who gets notified and what happens when a limit is reached.

01

Set the rule

Choose suitable limits and notifications for each connection.

02

Get the signal

Alert the right people as usage or spend reaches the selected thresholds.

03

Take action

Review the need, adjust authorised limits or add an appropriate bolt-on.

Limits apply to individual connections, including when configured through a group profile.

Set the policy once. Manage the group.

Organise connections around roles, departments or how people work.

FIELD TEAMS

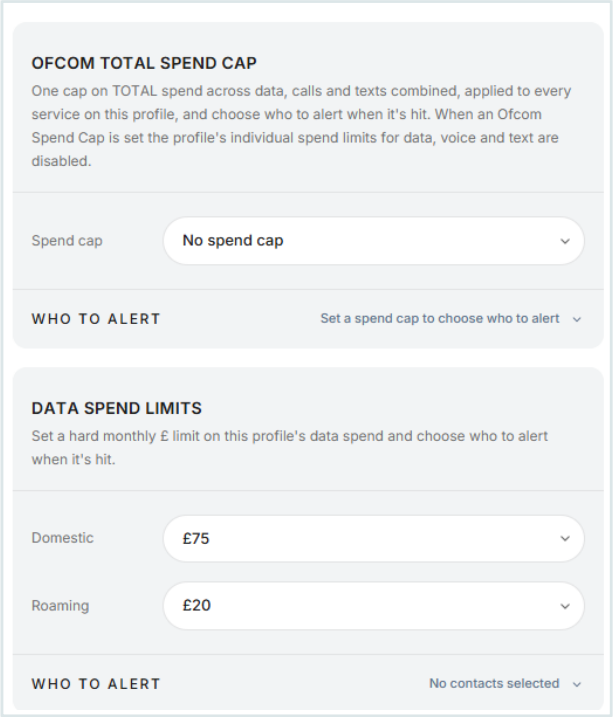

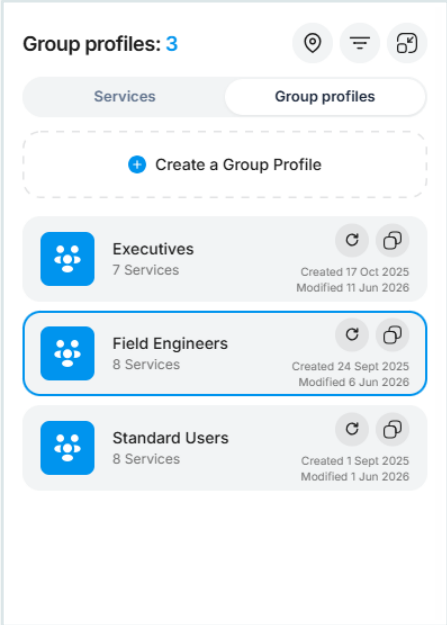

Data and settings for work on the move.

OFFICE TEAMS

Consistent controls for everyday use.

FREQUENT TRAVELLERS

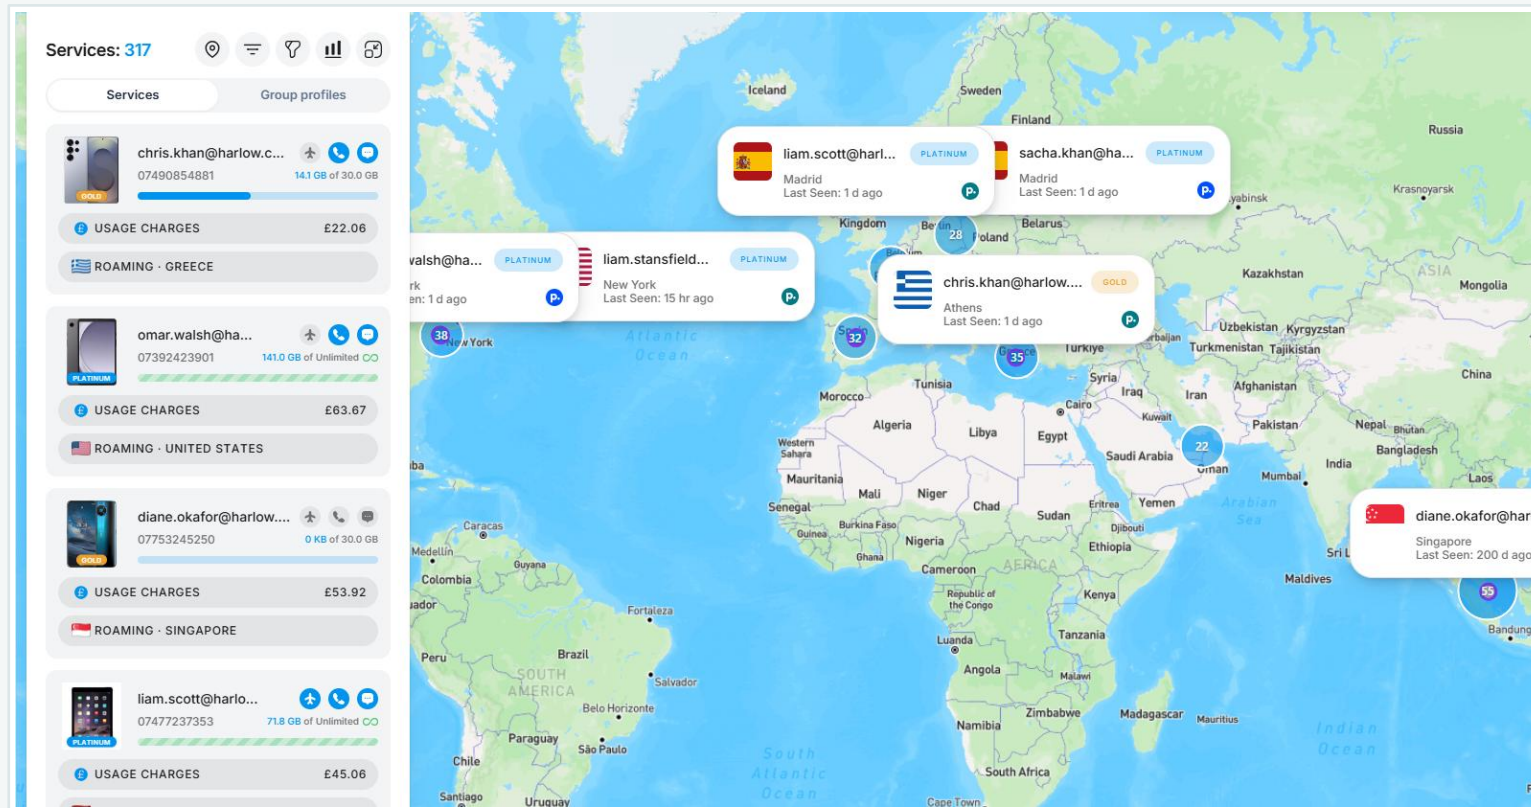

Roaming settings that reflect the job.

Add members and apply the profile.

Demo screen. Example data. Features depend on package and permissions.

Keep the next trip under control.

Demo screen. Example data. Features depend on package and permissions.

1 Before departure

Review the destination, package and roaming permissions.

2 While away

Keep an eye on usage and the relevant alerts.

3 When needs change

Add a suitable roaming option or review an authorised limit.

A phone problem needs a clear next step.

Better service information helps CTN narrow down what is happening.

01

Check the service

Look at the line status, recent activity and connection progress.

02

Check the restrictions

Identify whether a bar or spend control is affecting use.

03

Choose the next action

Use coverage information and escalate the issue when needed.

Your team has a point of contact. CTN has the information to investigate.

A clearer move for every number.

- 1

Plan the move

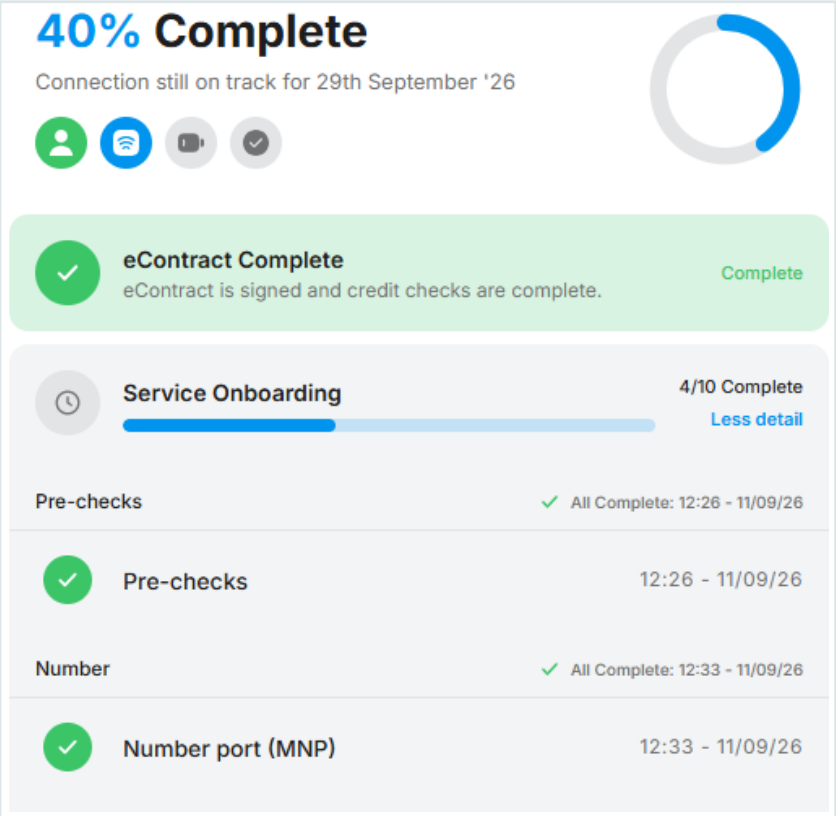

Agree the numbers, transfer dates and service requirements with CTN.
- 2

Prepare the setup

Organise profiles, cost centres and suitable controls for the team.
- 3

Follow the progress

CTN can check connection stages and keep you informed as the move completes.

Demo screen. Example data. Features depend on package and permissions.

Give finance a clearer view.

Connect the monthly bill to the people and teams behind it.

YOUR BUSINESS

Sales Customer-facing connections

Operations Field and office teams

Leadership Management and travel

ILLUSTRATIVE COST-CENTRE STRUCTURE

Invoice history

Keep account records easy to find.

Itemised usage

Look into the activity and charges behind a connection.

One business. Different teams. Sensible controls.

Illustrative setup: the controls follow the role, not just the handset.

12

Field team

Review data needs and the settings people need away from the office.

8

Office team

Apply a consistent everyday policy and nominate the people who receive alerts.

4

Frequent travellers

Plan the relevant roaming permissions, limits and add-ons around destinations.

Start with your team. Build the right setup.

01

Review

Share your connection count, contract dates, current usage and travel needs.

02

Configure

Agree suitable packages, profiles, permissions, alerts and limits.

03

Support

Work with CTN through the move and review the setup as your business changes.

CTN will confirm feature availability, permissions and any additional charges in your proposal.

Take control of your business mobiles.

Book a mobile account review with CTN.
